

FAQ...

What is the procedure for installing a large screen TV monitor to work with our library automation system?

Since this installation is beyond the scope of the normal Library Services computer installation, you should include this cost in your regular A & I estimate for library automation requirements.

A. Contact the Complex Project Manager (CPM) at your local Facilities department and have them provide you with an A & I estimate covering the following items:

- 1. Recommended location and type of mounting bracket, i.e., wall mount or ceiling mount. It is up to you to specify whether or not you want a VCR tray with the TV bracket.*
- 2. Installation of mounting bracket.*
- 3. Installation of electrical outlet in close proximity to the bracket.*
- 4. Installation of TV monitor (and VCR) on bracket.*

(For a copy of the mounting bracket catalog and prices, contact Segull Security Systems at 818.996.1020.)

B. Contact ITD Electronics, Installation Department at 323.224.2230 (voice) or 323.224.5182 (fax) for an estimate of the following items:

- 1. Installation of conduit/access for the cables from the TV monitor to the elementary control desk or secondary workstation.*
- 2. Providing and installing the appropriate cables, connectors, etc. (video and sound), along with the installation of the distribution amplifier from the TV monitor to a computer workstation.*
- 3. Installation of conduit/access for cable TV to VCR.*
- 4. Installation of cable TV line to VCR, if necessary.*
- 5. Connection between TV monitor and VCR, if necessary.*
